

INCLINE CHEST PRESS

The **Maxfit Maximus Incline Chest Press** is a premium commercial **upper chest training machine** engineered to **maximize activation of the clavicular pectoral fibers** and **anterior deltoids** through a biomechanically optimized **incline pressing trajectory**. Designed for smooth resistance delivery, natural upper body mechanics, and controlled pressing performance, the machine delivers effective upper chest development with superior comfort and movement stability.

- ✦ Incline pressing movement for enhanced **upper chest development**
- ✦ Independent arms for **unilateral and bilateral** exercises
- ✦ **Neutral and pronated grip** variations for diversified muscle recruitment
- ✦ Neutral grip enhances anterior deltoid activation
- ✦ **Physiological resistance curve** for smooth and progressive loading
- ✦ **Gas-assisted adjustable seat** for ergonomic alignment
- ✦ 6 additional integrated weight plate holders

Targets the Upper Pectoralis Major and Anterior Deltoids

Dimensions (L x W x H): 1426 x 1276 x 1545 mm
Net Weight: 92 kg
