

FIXED PULLDOWN

The **Maximus NX Fixed Pulldown** is a premium commercial back training machine engineered to **maximize lat development, upper-back strength, and controlled pulling performance** through smooth biomechanical pulldown mechanics. Designed with ergonomic grip positioning, adjustable seating, and stable heavy-duty construction, the machine delivers powerful activation of the latissimus dorsi, biceps, rear deltoids, and stabilizing musculature while maintaining natural and efficient movement throughout the exercise.

Fixed pulldown movement for complete back width development ✦
