

CVL STANDING PEC FLY

The **MAXFIT CVL Standing Pec Fly** is a plate-loaded machine designed to isolate the pectoral muscles through a natural standing fly movement. Featuring **bilateral lever arms**, it promotes balanced chest development, improved muscle symmetry, and stronger peak contraction while minimizing dominant-side compensation. Its space-efficient footprint makes it an excellent addition to commercial gyms, boutique studios, and strength training facilities

- ✦ Plate-loaded bilateral chest fly movement
- ✦ Enhances chest contraction and muscle isolation
- ✦ Standing exercise position for natural movement mechanics

Dimensions (L x W x H): 1630 x 1000 x 1520mm

Targets the pectoralis major for focused chest development
